

REMARKS

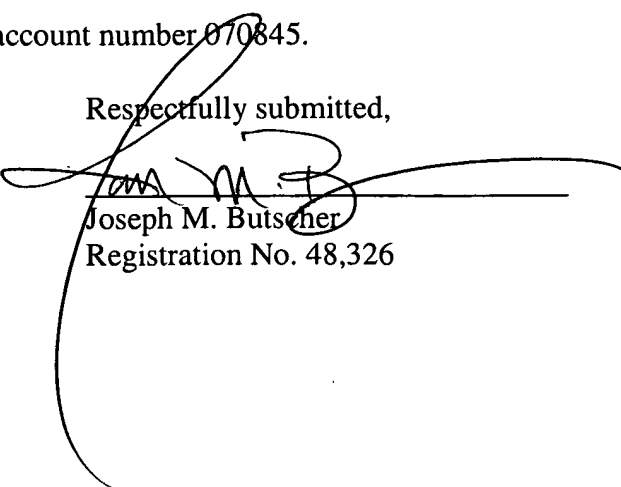

The present application included claims 9-34, and 39-43. Claims 13-34 and 40-43 have been allowed. Claims 9-12, and 39 have been rejected. In order to expedite prosecution, claims 9-12, and 39 have been cancelled without prejudice or disclaimer to the subject matter therein. The Applicant reserves the right to pursue the subject matter of previously pending claims 9-12 and 39 in a continuation application. New claims 44-48 have been added in place of previously pending claims 9-12 and 39. The Applicant respectfully submits that claims 13-34 and 40-48 define patentable subject matter.

New claim 44 is believed to conform to the Examiner's reasons for allowance. The Applicant notes that the Examiner's reasons for allowance emphasized the limitation "wherein the first input module converts the first analog video signal from a standard of the first video source to a bus standard." New claims 45-48 depend from new claim 44 and therefore include all the limitations of claim 44. In general, the Applicant respectfully submits that new claims 44-48, in addition to claims 13-34 and 40-43, are patentable over Sokawa alone, or in combination with Burton.

The Commissioner is authorized to charge any necessary fees or credit any overpayment to the deposit account of GTC, account number 070845.
